## RTI F.0 Users

- Product shipped 12/16/96 on Sun platform
- Current users represent Gov't & Industry
- SGI, IBM, HP, and Windows NT are coming ...

	<i>Sun</i>	<i>SGI</i>	<i>IBM</i>	<i>HP</i>	<i>WindowsNT</i>
<b>Delivered</b>	73	N/A	N/A	N/A	N/A
<b>Approved</b>	86	73	3	N/A	N/A
<b>Ordered</b>	124	129	5	24	64

# F.0 Support Calls

- Technical support calls are diverse in nature
  - How to download using Internet Explorer
  - C++ questions
  - How intricacies of API work
- Feedback from users has been positive
  - Installation very straight-forward and works well
  - Have not encountered any problems with F.0 that were the result of software defects

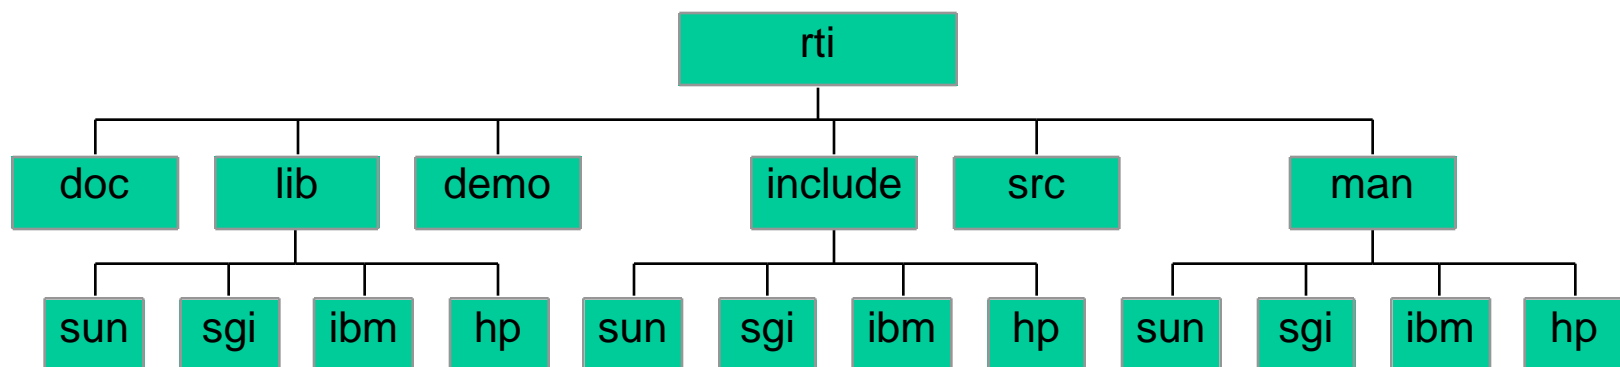

# Current Support Activities

- CORBA Cap received from OSC
- Porting distribution to additional platforms
- Infrastructure Improvements
- Coordinating International Distribution with DTIC

# Cross-platform Distribution

- Extending installation, example programs, and distribution to support additional platforms

Cross-Platform Directory Structure

# F/1.0 Configuration Management

- Ports are maintained on separate branch in version tree
- After a port passes testing it is merged into the single-sourced branch
- Interoperability testing is performed across platforms
